

EBUS

MASTER CLASS 2019

AIG Hospitals, Gachibowli,
Hyderabad, India.

30th November, 2019

Initiative by
Department of Pulmonology

Supported by

Dear friends,

It is indeed a pleasure to invite you all to our AIG "EBUS TBNA" master class. Endobronchial ultrasound (EBUS) has been the game changer in field of interventional pulmonology. It has totally revolutionised the way mediastinal diseases are diagnosed and treated. It is very essential for the young bronchoscopists to learn and practice conventional TBNA and EBUS TBNA for accurate diagnosis of mediastinal diseases like tuberculosis and lung cancer.

It is with this motto in mind we are conducting this one full day master class which contains didactic talks, live demonstration of conventional TBNA and EBUS TBNA. The talks will be followed by Hands-on in skill lab on simulators. The delegates will get a all round experience of EBUS TBNA and conventional TBNA.

Regards

Dr Vishwanath Gella

Organising secretary

PROGRAMME

Time	Topic	Faculty
